

This report provides a summary of the Public and Government consultation, feedback received, and actions undertaken in response.

The summary has been developed through analysis of individual items of feedback to identify common themes, areas of consensus and divergent views. The analysis along with expert advice has also informed the actions taken in response to the feedback.

Where feedback was not implemented a rationale has been provided.

Analytics covering broad consultation

Consultation Activities

Public and Government Consultation was open for this project from: **03 June until 28 June 2024.**

Manufacturing Alliance conducted three webinar information sessions to gather feedback with the aim to reach broad consensus from a variety of stakeholders.

Documents provided below:

- Appendix A - List of Stakeholders Consulted
- Appendix B - High Level Consultation Log
- Appendix C - Detailed Consultation Log
- Appendix D - List of Stakeholders Consulted through UEEA Training Council Network
- Appendix E – Summary of Consultation Feedback.

The changes to the unit codes have been updated for the 5 units. The new codes are reflected in the affected qualifications including the Companion Volume.

Appendix C - Detailed Consultation Log

Date	Organisation	Type	State	Channel	Component	Feedback	Response
12 June 2024	Rio Tinto	Employer	WA	Feedback Form	MEM24020	Just a note on MEM24039 Materials. There doesn't look like there's a requirement to teach welding processes. There's manufacturing process topics – forgings, casting etc but I can't see weldment process e.g. MMAW, GMAW, FCAW, SAW etc. Or is it included in this "MEM24012 Apply metallurgical principles" which wasn't part of the review?	The inspection of welds is addressed in the range of conditions where the defects in weldments are listed. There are two points in the knowledge evidence that also address fusion welding.
17 June 2024	Open Welding	Employer	VIC	Feedback Form	MEM24001 MEM24002 MEM24040	It is a redundant activity. There is simpler tech around now that nullifies its purpose.	The presence of new technology is noted, however there are significant sections of industry that still use dye penetrant processes that need to be supported by the MEM training package.
17 June 2024	Open Welding	Employer	VIC	Feedback Form	MEM24004	Nothing to add	Thank you for your support.

MEM: Non-Destructive Testing Skills Project Consultation Log Summary

Date	Organisation	Type	State	Channel	Component	Feedback	Response
17 June 2024	Open Welding	Employer	VIC	Feedback Form	MEM24019	AUS/NZ and ISO standards don't give enough weight to newer NDT methods.	The scope of this project addresses the alignment of NDT units of competency to better support the changes in ISO's affecting the classification of technician levels. Additional proposed changes to units have been included in this work to provide awareness of new methods and techniques.
17 June 2024	Open Welding	Employer	VIC	Feedback Form	MEM50424	There are NDT competencies that can be utilised that don't need a formal diploma.	Noted and thank you for your feedback.
17 June 2024	Open Welding	Employer	VIC	Feedback Form	Skill Set		
17 June 2024	Open Welding	Employer	VIC	Feedback Form	CVIG	Haven't seen it.	The companion volume implementation guides can be viewed through the Manufacturing Alliance website on the NDT project page.
17 June 2024	Open Welding	Employer	VIC	Feedback Form	General	In the welding space there is a huge amount of waste in NDT practice that could be removed and help the industry be more efficient.	Your feedback and the accompanying documentation provided have been noted. Thank you.
18 June 2024	Manufacturing Skills Queensland	State/Territory representative	QLD	Feedback Form	Qual	Agree with proposed changes	Thank you for your support.
18 June 2024	Manufacturing Skills Queensland	State/Territory representative	QLD	Feedback Form	Skill Set	Agree with proposed changes	Thank you for your support.

MEM: Non-Destructive Testing Skills Project Consultation Log Summary

Date	Organisation	Type	State	Channel	Component	Feedback	Response
18 June 2024	Manufacturing Skills Queensland	State/Territory representative	QLD	Feedback Form	CVIG	Agree with proposed changes	Thank you for your support.
18 June 2024	PWR Advanced Cooling Technology	Employer	QLD	Information Session	MEM50424	I have noticed you have done some work on the Diploma of NDT becoming MEM50424. I notice there is no RTO that has the qualification on scope, is there something in the works in the program?	The qualification was released just over 12 months and RTOs may not have implemented this qualification yet.
18 June 2024	QMS NDT & NACE	Employer	SA	Information Session	General	Will there be some distance learning i.e. theoretical classrooms online NDT testing methods?	We note your feedback however, this is outside the scope of the current project.

MEM: Non-Destructive Testing Skills Project Consultation Log Summary

Date	Organisation	Type	State	Channel	Component	Feedback	Response
21 June 2024	Australian Institute of Engineering	RTO	VIC	Feedback Form	MEM24040 MEM24041 MEM24042 MEM24043 MEM24044	While I appreciate the effort to expand and update the curriculum, I do not agree with the proposed new unit MEM24040 Undertake basic penetrant tests at this time. We currently have foundational units that cover similar content, and it is unclear how this new unit would add distinct value or address a specific gap not already covered. Although it is mentioned that this new unit reflects the requirements of the new technical standards, it raises the question of why these requirements were not integrated into the existing units to enhance their credibility. Understanding the rationale behind the creation of MEM24040, including its objectives and differentiation from existing units, would help in assessing its necessity and potential impact.	The unit MEM24001 Perform basic penetrant testing applied to both welders and other tradespersons testing their own work and also Level 1 NDT technicians. After a close examination of the new technical standards and guidance material produced by AINDT and made available to Manufacturing Alliance, it was decided that a single unit serving both occupational groups was no longer appropriate. A new unit MEM24040 Undertake basic penetrant tests was developed for Level 1 NDT technicians and aligned to the new technical standards. The title for the unit for tradespersons remained as "Perform basic penetrant tests". The same changes were made for all of the previous basic test units.
21 June 2024	Australian Institute of Engineering	RTO	VIC	Feedback Form	Skill Set	Agree with proposed changes	Thank you for your support.

MEM: Non-Destructive Testing Skills Project Consultation Log Summary

Date	Organisation	Type	State	Channel	Component	Feedback	Response
21 June 2024	Australian Institute of Engineering	RTO	VIC	Feedback Form	CVIG	Agree with proposed changes	Thank you for your support.
24 June 2024	TAFE Queensland	RTO	QLD	Information Session	General	As the updated units are proposed to change and sit in other qualifications, will those qualifications be updated?	Affected qualifications will have an updated release number and release date, as part of Training Package Maintenance illustrated on our website under the NDT project page heading 'Training Package Maintenance – Minor Changes.'
24 June 2024	Open Welding	Employer	VIC	Information Session	General	Quoting ISO 9712 discounts for previous experience. Do you incorporate the structure into the units?	Technical standards apply in AINDT to recognise candidates under their structure to issue certification. Initial consultation with AINDT agreed to align the technical standards as much as practicable taking into account compliance within the Training package organising framework (TPOF).
24 June 2024	Open Welding	Employer	VIC	Information Session	General	What is the ambition driving this? Are you trying to get more technicians qualification for NDT?	The intent of this project was to align MEM NDT units with the ISO technical standards.

MEM: Non-Destructive Testing Skills Project Consultation Log Summary

Date	Organisation	Type	State	Channel	Component	Feedback	Response
24 June 2024	Open Welding	Employer	VIC	Information Session	General	Do you accommodate recognition of prior learning (RPL)? How does a candidate get qualified?	All units and qualifications developed by Manufacturing Alliance are designed to suit actual delivery or RPL by a Training Provider.
24 June 2024	Australian Submarine Corporation (ASC)	Government	SA	Information Session	General	Will the qualification or units show the mapping across the standards?	Initial consultation with AINDT agreed to align the technical standards as much as practicable taking into account compliance within the Training package organising framework (TPOF).
24 June 2024	Australian Submarine Corporation (ASC)	Government	SA	Information Session	General	Regarding the certification ISO 9712, are the hours of training and experience incorporated into the revised units or qualifications?	Under the TPOF, we cannot specify the hours of training and experience that AINDT specifies. However, we have developed units of competency to describe the skills and knowledge required to meet the competency requirements of the task.
24 June 2024	Australian Submarine Corporation (ASC)	Government	SA	Information Session	General	Are the competencies supported by other companies or AINDT?	AINDT has been consulted on the project and has a representative member on the Technical Committee.

MEM: Non-Destructive Testing Skills Project Consultation Log Summary

Date	Organisation	Type	State	Channel	Component	Feedback	Response
24 June 2024	TICS	Employer	QLD	Information Session	General	A few employees undertaking Certificate III in Engineering – Technical, which has limited NDT units, could benefit from the nationally recognised training.	Noted. There are five NDT units can be included in the Certificate III in Engineering - Technical qualification. Each RTO can determine the elective units they will deliver as part of the qualifications.
26 June 2024	AW Bell	Employer	VIC	Information Session	General	It's great to see that they are all being revised. Talking about North American companies, they require NAS 410 certified non-destructive testing technicians. Does the revision take into account any of the NAS 410? That is, is there any push to try and get reciprocal recognition, to support US, air space and defence contracts?	<p>Thank you for your feedback. The MEM NDT units allow training against other NDT standards to be used as part of the delivery and assessment against the unit of competency.</p> <p>The successful achievement by a student of the proposed NDT units of competency can support an application for industry recognition by a standards body such as AINDT or NAS 410 certifying organisations.</p>

MEM: Non-Destructive Testing Skills Project Consultation Log Summary

Date	Organisation	Type	State	Channel	Component	Feedback	Response
26 June 2024	Qantas Engineering	Employer	NSW	Information Session	General	<p>The preferred technical standard for the qualification of QANTAS NDT staff is EN4179, which is parallel to NAS 410 and the National Aerospace NDT Board looks at the recommended standard for the staff training syllabus and that's ISO 25107.</p> <p>It then falls back to the Level 3, to look at someone's training and in particular the transition from general industry moving across to aerospace.</p> <p>This forum is more about developing the MEM as opposed to looking at industry accreditation and the central industry certifying body.</p>	<p>Thank you.</p> <p>This is the underpinning training that is required for entry into the industry and then the certification comes from the recognising authorities.</p>
27 June 2024	Protonautics Pty Ltd	Employer	QLD	Feedback Form	Skill Set	<p>We welcome and support these training initiatives and intend to fully cooperate with the new initiatives to ensure that we are up to date with any industry changes and legislative requirements relating to our NDT inspection department.</p>	<p>Thank you for your support.</p>

						applicable standard for thermography is ISO 18436	diagnostics of machines - Requirements for qualification and assessment of personnel, Part 7: Thermography.
16/06/2025	Australian Institute for Non-destructive Testing (AINDT)	Association/SME	National	Email	MEM24034	No specific mention of the testing being conducted under the supervision of an NDT Level 3 with qualifications or experience in the use or CR/DR technologies.	Statement included under the Application to address conduct under supervision: These employees work under the general supervision of personnel such as engineering associates, NDT technicians aligned to level 3 in technical standards; professional engineers and scientists; engineering technologists; and production, operations and maintenance managers. Additionally, the statement below has been added to address radiation safety: Individuals must adhere to the state and national safety regulation in relation to radiation use and licencing.
16/06/2025	Australian Institute for Non-destructive Testing (AINDT)	Association/SME	National	Email	MEM24035	No mention is made of the need for this testing to be conducted under	Statement included under the Application to address conduct under supervision:

						the supervision of an NDT Level 3 or similar.	These employees work under the general supervision of personnel such as engineering associates, NDT technicians aligned to level 3 in technical standards; professional engineers and scientists; engineering technologists; and production, operations and maintenance managers.
16/06/2025	Australian Institute for Non-destructive Testing (AINDT)	Association/SME	National	Email	MEM24036	Consideration might be given to including the Apply Codes and Standards to NDT module MEM 23048 to the list of prerequisites for this module as the conduct of VT activities requires an extensive knowledge of related NDT and Manufactured product standards.	Statement added under Application for consistency: here the use of Codes and Standards is required, Unit MEM24038 Apply codes and standards to non-destructive testing should also be selected.
16/06/2025	Australian Institute for Non-destructive Testing (AINDT)	Association/SME	National	Email	MEM24037	No mention is made of the need for this testing to be conducted under the supervision of an NDT Level 3 or similar.	Statement included under the Application to address conduct under supervision: These employees work under the general supervision of personnel such as engineering associates, NDT technicians aligned to

							level 3 in technical standards; professional engineers and scientists; engineering technologists; and production, operations and maintenance managers.
16/06/2025	Australian Institute for Non-destructive Testing (AINDT)	Association/SME	National	Email	MEM24042	Not sure the extensive technical and theoretical requirements for ET constitutes a basic test method. This unit seeks to cover the conduct of tube testing, material sorting, defect/crack detection and coating thickness determination all of which seems inconceivable for a basic or entry level qualification.	No action. As discussed, the scale of this unit is determined by the different context listed in the Range of Conditions. There is no expectation that the full range of conditions will be used, usually only one is chosen.
16/06/2025	Australian Institute for Non-destructive Testing (AINDT)	Association/SME	National	Email	MEM24043	Refers to the conduct of plate lamination testing in the knowledge requirements which would be outside the scope of a basic UTT NDT qualification and could be removed for clarity.	References to lamination have been removed throughout the unit including Application, Range of Conditions and Knowledge Evidence.
16/06/2025	Australian Institute for Non-destructive Testing (AINDT)	Association/SME	National	Email	MEM24044	Not sure the extensive technical and theoretical requirements for RT constitutes a basic test method. This unit seeks	Statement added under Application to address radiation safety requirements:

						to cover the conduct of radiographic examination of an extensive range of items and materials including choice of test method equipment, set up and exposure plus film processing and interpretation, all of which seems inconceivable for a basic or entry level qualification. It was noted RT safety is addressed but no specific mention on the need for radiation personal use licences in all state jurisdictions.	Individuals must adhere to the state and national safety regulation in relation to radiation use and licencing.
26/06/2025	Australian Institute for Non-destructive Testing (AINDT)	Association/SME	National	Email	All	<p>Good morning Chris,</p> <p>As per our earlier discussions and your feedback to the AINDT review, we have now updated our review document to take into account your amendments and clarifications.</p> <p>As requested, the AINDT is now comfortable with the proposed Skills Modules to proceed however we would</p>	<p>Thank you for your support.</p> <p>We have noted your specific points of feedback regarding basic NDT units which will be considered as part of future MEM projects.</p>
